

## Collaborating Institutions

### **SENER-Secretariat of Energy**

Mexico's Secretariat of Energy is charged with leading the country's energy policy, within the current constitutional framework, to guarantee the competitive, sufficient, high-quality, economically viable and environmentally sustainable supply of energy required for the development of national life.

### **CONACYT-National Council for Science and Technology**

The National Council of Science and Technology was created by provision of the H. Congress of the Union on December 29, 1970, as a decentralized public body of the Federal Public Administration charged with developing science and technology policies in Mexico.

### **CONACYT-SENER Energy Sustainability Fund**

The Energy Sustainability Fund is an instrument created by the Government of Mexico to develop the national energy sector in four key areas: energy efficiency, renewable sources, use of clean technologies and diversification of primary energy sources.

### **CONUEE-National Commission for the Efficient Use of Energy**

The National Commission for the Efficient Use of Energy is a decentralized administrative body of the Energy Secretariat. It was created by the Law for the Sustainable Use of Energy published in the Official Gazette of the Federation on 28 November 2008, and its main objective is to promote energy efficiency and act as a technical body in the field of sustainable energy use.

### **UNAM-National Autonomous University of Mexico**

The National Autonomous University of Mexico was founded on September 21, 1551 with the name of the Royal and Pontifical University of Mexico. It is the largest university in Mexico and Latin America. Its primary purpose is to serve the country and humanity; train professionals useful to society; organize and conduct research, mainly on national conditions and problems, and to extend the benefits of culture as widely as possible.

### **INEEL-National Institute of Electricity and Clean Energy**

INEEL is a research center of the energy sector, dedicated mainly to the electrical and energy areas of Mexico. Its main objectives are research, applied innovation, technological development, engineering and specialized technical services in areas such as energy efficiency, planning and expansion of the national electricity system, reliability, safety, simulation, renewable energy, automation, and new information technologies.

### **IER-Institute for Renewable Energies (UNAM)**

The mission of the Institute is to carry out basic and applied scientific research in energy, with emphasis on renewable energies, which contribute to the development of sustainable energy technologies. In addition, IER carries out studies, consultancy and training to the different sectors of society; trains specialized human resources and disseminates the knowledge acquired for the benefit of the country

### **ITC-Technological Institute for Construction**

The Technical Institute of Construction (ITC) was created in 1983 as part of the Mexican Chamber of Construction Industry. Its mission is to train executives and owners of construction companies and foster closer linkages between industry and education.
