

## Postdoctoral Exchange Program

In Fall 2016, three postdoctoral fellows from the Institute of Renewable Energy (IER) at the National Autonomous University of Mexico started a fellowship at Berkeley Lab with the support of the SENER-CONACYT Energy Sustainability Fund (FSE). A welcome reception attended by the Consul General of Mexico, Gemi José González López, and the Director of IER, Antonio del Río, was held on November 9 to mark the occasion and highlight the importance of this collaboration. The Mexican postdocs are doing research on reliability of materials and solar cells.

*Antonio del Río, Director of the Institute for Renewable Energies (UNAM); Horst Simon, Berkeley Lab Deputy Director and Lynn Price, Acting Director of the Energy Analysis and Environmental Impacts Division with the three Mexican postdocs: Christian Coria Monroy, Mauricio Solís de la Fuente and Dalia Martínez Escobar.*
